**DIVISIONAL APPLICATION**

Sir,

This paper is herewith filed in conjunction with the filing of a Rule 53(b) Divisional Application, and is accompanied by a new specification. A copy of the signed declaration for the parent application is included.

**Remarks** begin on page 2 of this paper.

## Remarks

This paper is herewith filed in conjunction with the filing of a Divisional Application using the procedures set forth in 37 CFR 1.53(b), and as further provided for in MPEP 201.06(c). This paper is accompanied by a new specification. Formal drawings from the parent application are included. A copy of the signed declaration, as filed in the parent application, is also included.

The new specification contains certain changes to the specification of the parent application. These are: amendments to the title and the abstract of the disclosure; addition of a cross reference to related applications; addition of paragraph numbering; and, the addition of the desired set of claims. No new matter has been added.

This divisional application is made as a result of a restriction in the parent application 10/060,767, being examined in Art Unit 1774. Claim 1 of this divisional application correlates to claim 29 of the parent application. Claims 2 - 47 are original claims first presented in this filing of a divisional application. Claims 39 - 47 are method claims which should be examined with the composition claims. Support for the newly added claims is found at least in paragraphs 0048 - 0054 of the specification.

Applicant respectfully requests that an early Notice of Allowance be issued in this case.

Respectfully submitted:

Ira M. Turner
